

ENGLISH, POWER, ACCESS

AI And Learning Access

ACCESS GROWS. LEARNING VARIES.

AI can widen practice access

TUTOR TIME

Faster help

Waiting can shrink.

FORMATS

**More
explanations**

Examples can
change.

PRACTICE

**More
attempts**

Feedback can
repeat.

LANGUAGE

**Translation
support**

Coverage still varies.

Access is not equal learning.

Use AI as a scaffold

Hints preserve useful struggle.

Answers can replace practice.

The learner stays responsible.

Structured tutors can help

RCT

METHOD

Random
assignment used.

1

COURSE

College physics
tested.

LEARNING

Tutor group
learned more.

TIME

Tutor group used
less.

Evidence: designed tutoring helped.

Limit: one narrow setting.

Performance can hide learning

+48%	Open chat practice
+127%	Guarded tutor practice
-17%	Open chat exam
NO HARM	Guarded tutor exam

HIGH SCHOOL MATH

Practice scores improved.

Independent learning suffered.

Guardrails reduced harm.

Better answers may hide learning.

Fluent text can mislead

FALSE FACTS

Confidence can
hide errors.

LANGUAGE BIAS

Coverage stays
uneven.

CULTURE BIAS

Local knowledge
may fade.

SOURCE GAPS

Citations may not
exist.

Evidence: models remain fallible.

Fluent text is not truth.

Privacy and access still divide

1

PRIVATE DATA

Remove personal details.

2

CONSENT

Check age and consent.

3

COSTS

Devices and data matter.

4

DISCLOSURE

Name machine use clearly.

EU RULES

Chatbots require disclosure.

AUGUST 2026

Access requires safe conditions.

Keep human learning visible

EVIDENCE: Design changes outcomes.

INFERENCE: Agency protects learning.

NEXT: Recognition without prestige
